

No Limits to Growth?

A Societal Transformation Scenario
to limit global warming to

1.5°C

Societal Transformation Scenario - Key Premises

1

Countries of
Global North
have to act

2

Consumption &
Production have
to be reduced

3

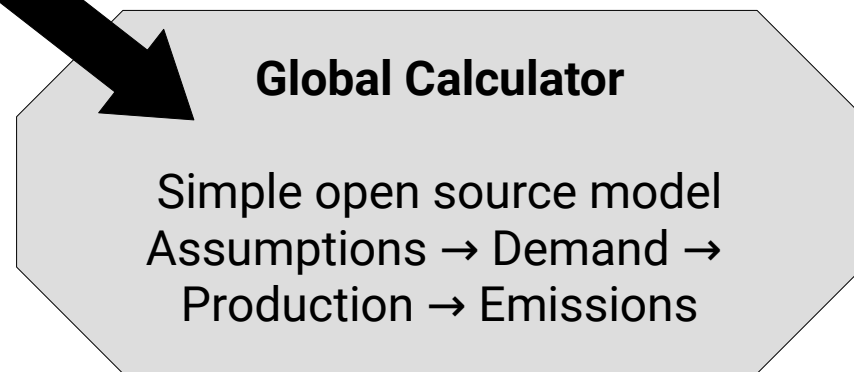

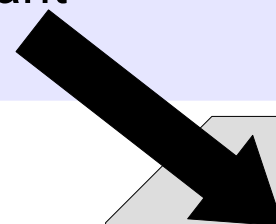

A good life for
all with less is
possible

4

Exclusion of
nuclear &
“neg. emissions”

Assumptions of the STS for Global North/Annex I countries

	Changes up to 2050
share of cars	-81% cars in urban areas, -52% in rural areas
flights per person	falls to 1/a by 2025 and 0,33/a in 2050
living space	-25%/person
meat consumption	-60% by 2030, then constant

Global emissions in the STS
